

Dictate and Talk on the Phone, through the Same Headset

Interchangeable,
reversible
earloops for
perfect fit on
either ear

Over-the-head
headband for
stability

Over-the-Head

On-the-Ear

This wireless headset comes with four different size snap on ear loops, as well as the over the head loop. This allows the microphone to be worn over either ear, and interchangeably with over the ear or head style usage.

It uses the new 1.9 GHz voice-dedicated frequency, which provides users with strong sound quality for optimal voice and hearing clarity. Using the new voice-dedicated 1.9 GHz DECT frequency, you don't have to worry about interference from nearby Wi-Fi networks, cordless telephones, and other wireless office equipment common on other frequencies. The results are superior audio clarity with no interruptions.

We modify this headset to allow you to seamlessly switch from using the headset to wirelessly dictate into your computer, and allow you to switch back and forth to use the same headset to talk on the phone.

The sound quality for both talking on the telephone and dictating to the computer, is excellent. It is the most accurate speech recognition microphone we have ever used.

Talk Time	Up to 8 hours
Standby Time	Up to 70 hours
Range	Up to 300 feet from the base
